## Education

---

**Bachelor of Engineering in Computer Science and Engineering** **2023 – 2027**  
*Sahyadri College of Engineering and Management* *CGPA: 9.44 (upto 6th Sem)*

## Experience

---

**Software Engineering Intern** **Sept 2025 – Present**  
*Datavex.ai Pvt Ltd*

- Worked as a Backend Developer on an AI-powered CRM platform, building high-performance FastAPI routes with optimized SQLAlchemy schemas, and collaborating on Azure deployment for a US-based client.
- Developed an automated email processing system that reads incoming inquiries, analyzes content using AI models, and generates context-aware replies based on client workflows.
- Architected a multi-tenant Education SaaS platform in Spring Boot with core CRM and student profiling microservices, using Apache Kafka for real-time state sync, Google OAuth2/JWT multi-tenancy, and a Spring AI (Gemini) + Tesseract OCR admissions data extraction pipeline.
- **Tech Stack:** FastAPI, SQLAlchemy, Spring Boot, Spring Cloud, Spring AI, Apache Kafka, PostgreSQL, Azure, Docker, Microsoft Graph API, Alembic, Azure OpenAI, Tesseract OCR.

## Projects

---

### ProcureMind – Event-Driven Procurement Platform

- Built an event-driven platform for enterprise procurement contract analysis and risk assessment using Spring Boot, Spring Cloud Gateway, and Kafka.
- Developed a PageIndex-inspired, structure-aware RAG pipeline using Spring AI, Apache Tika, and PostgreSQL for hierarchical contract retrieval.
- Integrated MinIO, PostgreSQL, Flyway, and Docker Compose with idempotent event processing across 9 containers.
- **Technologies:** Java, Spring Boot, Spring AI, Kafka, PostgreSQL, MinIO, Tika, Flyway, Docker.

### Sanctuary – AI Personal Agent

- Developed a local AI agent in Python powered by the Gemini API for voice-based automation, integrating speech recognition for hands-free commands and a logic-based response system for spoken feedback.
- Designed a modular command architecture that made it easy to add new automation skills, covering application launching, file handling, and calculations.
- **Technologies:** Python, Gemini API, Speech Recognition, LlamaIndex.

### Pravaah – AI Legal Assistant

- Collaborated with a team to build a RAG-powered legal AI assistant offering simplified explanations for citizens and IRAC-structured analysis for professionals, covering 20+ Indian Acts.
- Integrated OCR to process scanned legal documents and added multilingual and voice support to broaden accessibility for non-technical users.
- **Technologies:** FastAPI, LangChain, Gemini 2.0, ChromaDB, OCR.

## Skills

---

**Languages:** Python, Java, SQL

**Frameworks & Backend:** FastAPI, Spring Boot, Flask, Streamlit, Spring Cloud

**AI / ML:** LangChain, RAG, Gemini API, Spring AI, OCR

**Databases:** PostgreSQL, MySQL, MongoDB, ChromaDB, Firebase

**Developer Tools:** Git, GitHub, Docker, Azure, Apache Kafka, KNIME

**Core CS:** Data Structures and Algorithms, Object-Oriented Programming, Databases, Software Engineering
